

Japan made ultra-thin 9H hardness Glass Coating protects your smartphone !

Smart protection without film!

**Easy & fast
application in 15 min!**

• Durable against 500g iron ball from 50cm in DuPont impact test.
• Certified 9H hardness in JIS (Japan Industry Standard) official pencil hardness test. (Coating film reaches 9H hardness 3 days after application of SAVER)

※ SAVER doesn't assure "no crack, no scratch" in dropping, heavy impact. It protects and keeps clean screen in the normal daily use of mobile device.
※ If you throw your phone, sit on chair with your phone inside pocket, left your phone in the car in hot summer, your phone might be damaged regardless coating of SAVER.

New Smartphone Coating

SAVER

Produced by : J-Tech Transfer and Trading
Fukuoka, JAPAN
