

## Letter of Agreement (Disclaimer) for application of SAVER 9H coating

[1] SAVER 9H coating is Japan made screen protection liquid for **glass screen** such as smartphone, tablet PC, eyeglass, car navigation, portable game. The benefit of SAVER is;

1. Less residue
2. Less crack, scratch
3. Smoother touch, clearer screen
4. Faster response in operation (due to better recognition of stat electrics)
5. Less fingerprint, cosmetic foundation, facial oil
6. Easier wipe of fingerprint, cosmetic foundation, facial oil
7. No air and dust between coating film and screen
8. 2 years lifespan, cheaper than glass protection film
9. No depreciation when you sell your phone
10. Harder than normal glass (9H hardness certified by JIS, Japan Industry Standard)
11. Non hazardous material contained. Safe for children.

Although it is made of 9H hardness liquid glass, **we don't assure it's not broken nor scratched if you dropped your phone on concrete or stone.** Please don't throw, cut, drop your phone even if you coated your phone with SAVER. SAVER will protect your phone **in normal daily use.**

[2] If your phone had been damaged and had crack in some parts on screen **before coating SAVER**, these old damage and crack might cause additional crack when you dropped phone even after coating SAVER.

[3] Even if you dropped your phone and it is damaged, the crack or scratch might be less if you coated phone with SAVER. That will reduce cost in repairing your phone.

[4] The coating film **reaches 9H hardness within 3 days.** Please do not put key, lighter, metal accessories with phone in your pocket or bag **for 3 days after coating.**

[5] The touching feeling of screen is sticky in **1-2 days after application.** **Within 4-5 days** the screen get smoother.

[6] If you are using booktype case or cover, please be careful your **credit cards not to touch/push screen** for 3 days after application.

[7] SAVER **cannot be removed** after application. The selling price might be higher if you kept your phone clean with SAVER.

[8] SAVER coating has durability agains heat **up to 385 degrees of Celsius.** But it protects **only glass screen.** If you left your phone in hot car, your phone will be damaged nevertheless you coated SAVER.

[9] SAVER doesn't have **property of water proof.**

[10] SAVER service is **no warranty.** Please make sure **switch on after you finished application of SAVER.**

(Please cut letter in this part, and give above contents to customer so as not to be forgotten what he/she agreed)

=====

**I have read and confirmed the contents of this letter. I order SAVER coating on my device.**
